

BCAC591 SEMESTER PROJECT

Mandatory Key Points and Checklist

Project Submission & Deadlines

- **Deadline:** 3rd week of September, during your respective lab class **ONLY**.
- **No separate submission window will be provided.**

Project Details Report Requirements

Your Project Details Report must include:

- **Project Title**
- **Problem Statement:** 3–4 lines detailing the problem, its solution, and target users.
- **User Roles:** Minimum of 2 roles (e.g., Student, Admin) with clearly defined capabilities.
- **Module List:** Mapping of all **mandatory modules** (and relevant optional ones) to your project.
- **Database Tables (Draft):** Key main tables with their essential columns.
- **Page List:** A comprehensive list of every screen in your project.

Submission Process

- Submit your report as a **PDF document**.
- Upload via the Google Form: <https://forms.gle/ZGXbgzJLwYFr9tms9>

AI Usage Policy

- AI tools are permitted for limited assistance.
- You **must be able to explain any AI-generated code or text**.
- **Blunt or unedited AI use can result in mark deductions.**

Mandatory Modules (Implement All)

- **Authentication:** Register, Login, Logout functionality. Passwords **must** be hashed using .
- **Role-Based Access:** Minimum of 2 distinct roles with different dashboard views.
- **Dashboard:** A proper landing page tailored to each user role.
- **Core Entity CRUD:** Implement Add, View, Edit, and Delete for your project's main subject.
- **Listing Page:** A table displaying records with **Search and Sort** functionality.
- **Detail View:** A dedicated page to show all information for a single record.
- **Status Workflow:** Minimum of 3 states (e.g., Pending → Approved → Completed).
- **Admin Panel:** Functionality for administrators to view all records, manage users, and update statuses.
- **Form Validation:** **Server-side validation using PHP** (HTML5 validation is supplementary).
- **Flash Messages:** Display success or error messages for **every action**.
- **Profile Management:** Users must be able to view and edit their own information.

Optional Modules (Implement If Relevant)

- File/Image Upload
- Booking/Selection Flow
- Rating/Feedback System
- Comment Threads
- Basic Reports/Counts

Development Process

- **Understand the Topic:** Approach from a real user's perspective.
- **Map Modules:** Clearly link mandatory/optional modules to your project's requirements.
- **Sketch Database:** Draft your database tables on paper **before** coding.
- **List Pages:** Detail every screen required for your project.
- **Prioritize:** Begin with **Authentication** and the core entity's **Add/View** functionality.
- **Follow Lab Demos:** Apply concepts demonstrated in each lab session.
- **Prepare PDF:** Compile your report and ensure it's ready **before** your lab class begins.

Note: This submission is a planning and understanding check. While it's not full working code, these modules will be assessed later. An organized first submission simplifies later development and ensures a smoother semester.

Submission Checklist

- ☐ Project Details Report created?
- ☐ Report includes Project Title?
- ☐ Report includes Problem Statement (3-4 lines)?
- ☐ Report includes minimum 2 User Roles with capabilities?
- ☐ Report includes Module List mapping mandatory modules?

- ☐ Report includes draft Database Tables (main tables + key columns)?
- ☐ Report includes comprehensive Page List?
- ☐ All **Mandatory Modules** implemented conceptually or in draft?
- ☐ Report saved as PDF?
- ☐ PDF submitted via Google Form (<https://forms.gle/ZGXbgzJLwYFr9tms9>)?
- ☐ Submission completed **during** lab class in the 3rd week of September?
